

Work From Home Sales Team Management Portal

This document contains the complete system workflow, features, dashboard modules, OCR lead scanning process, sales team management flow, QD process, PAN & Pincode verification workflow, incentive management, and full stack architecture for the Work From Home Sales Team Portal.

1. Project Overview

A complete CRM and Lead Management System designed for work-from-home sales teams. The system allows admins to manage sales agents, upload lead datasheets, scan leads using OCR technology, assign leads, monitor call activity, verify customer eligibility, process QD forms, and generate incentives.

2. Admin Dashboard Features

- Add / Edit / Delete / Suspend Sales Persons
- Upload Datasheets and Scan Leads
- Assign Leads to Sales Persons
- View Lead Status and Call Reports
- Review QD Forms
- Approve / Reject Leads
- Dispatch Eligible Leads
- Generate Incentive Reports

3. Sales Person Dashboard Features

- View Assigned Leads
- Call Customers
- Update Lead Status
- Verify PAN & Pincode
- Submit QD Details
- Upload Documents
- Track Incentives and Progress

4. OCR Datasheet Upload Workflow

Admin uploads images, PDFs, or Excel datasheets. The OCR engine scans the sheet and automatically extracts:

- Customer Name
- Mobile Number
- Pincode

Extracted data is converted into lead records and stored in the database.

5. Lead Assignment Workflow

Admin can assign batches of leads to specific sales persons. Example:

- 10 Leads → Sales Person A
- Next 10 Leads → Sales Person B

Admin selects users using a dropdown menu and assigns leads directly.

6. PAN & Pincode Verification Logic

During customer calls, sales persons enter PAN number and pincode. The system validates data through verification APIs.

If PAN already exists:

- Lead Status = Not Eligible
- Lead Closed Automatically

If Pincode Invalid:

- Lead Status = Not Eligible
- Lead Closed Automatically

If verified successfully:

- Lead Status = Eligible
- Move to QD Process

7. QD (Quality Data) Process

Common Details:

- Father Name
- Mother Name
- Address
- Mobile Number

Employment Type:

- Self Employed
- Salaried

8. Self Employed Workflow

Required Fields:

- Business Source
- Company Name
- Shop Board Photo Upload
- GST Number (Optional)
- Company Address
- Residential Address

9. Salaried Workflow

Required Fields:

- Employee Role
- Monthly Salary
- 3 Month Payslip Upload
- Bank Statement Upload

10. Incentive System

Incentives are generated only after admin dispatch approval.

- Eligible Status → No Incentive
- QD Submitted → No Incentive
- Dispatched → Incentive Generated

11. Recommended Tech Stack

Frontend:

- React.js
- Next.js
- Tailwind CSS
- ShadCN UI

Backend:

- Node.js
- Express.js

Database:

- PostgreSQL (Recommended)

OCR & AI:

- Tesseract OCR
- Google Vision API

12. Security Features

- JWT Authentication
- Role-Based Access Control
- Encrypted Passwords
- Activity Logs
- Secure File Uploads

13. UI & Dashboard Style

Recommended Design:

- Dark Violet Theme
- Neon Accent Colors
- Modern CRM Layout
- Space Grotesk Font for Headings
- Inter Font for Content

14. Complete Workflow Summary

Stage	Process
1	Admin Uploads Datasheet
2	OCR Scans and Extracts Leads
3	Admin Assigns Leads
4	Sales Person Calls Customer
5	PAN & Pincode Verification
6	Eligible Lead Moves to QD

7	QD Submitted
8	Admin Reviews & Dispatches
9	Incentive Generated
